2015-09-01 CGSync Meeting notes

Date

📅 01 Sep 2015 - last meeting

Attendees

- Thomas Cherry
- Christopher Gokey
- Chris Durbin

Questions

- when will we be dealing with "undefined" bucket levels (donut holes)?
    - CMR may be able to push something to Dev soon.
- not applicable and not provided is the same on the client side, it's a curation issue not search user
- case sensitivity solution caused more issues, reverting, need to get back to customer for direction here
- instruments is ready
- maybe a sit deployment tomorrow
- snip-it changes, length had a bug, but other parameters are added.
    - configuration is in the query parameters
    - documented in the regular search API doc
- extended metadata is not being worked on next, doing tagging, group for additional attributes being added
    - Tagging Design
